The U.S. Fish and Wildlife Service (Service) will coordinate directly with the Yamhill Partners for Land and Water (Partners) to promote results that are consistent with the goals of the Partners and the Service. The Service will:

- Work closely with the Partners when conducting outreach with landowners;
- Provide GIS support on a site specific basis as time and resources allow;
- Work with the Partners and landowners to understand the regulatory environment including agreements that provide regulatory assurances;
- Coordinate with the Partners to conduct listed and sensitive plant and animal surveys on properties of landowners who have agreed to have federally conducted surveys on their properties;
- Will inform the Partners and landowners about Service grant opportunities and provide technical assistance with the application process;
- The Service will work with the Partners to improve the quality and consistency of land management plans and their implementation.
